Software engineering apprentice and full-time M.Eng. student (Institut Mines-Télécom Nord Europe), with 2+ years shipping full-stack, DevOps and systems work in production, including at a national neutron-research facility (Institut Laue-Langevin) and on reverse-engineering-heavy products. Eligible for a CERN traineeship as a French national (CERN Member State). Seeking a 3-month technical internship where I can contribute from day one across C/C++, Java, TypeScript and Rust, CI/CD and observability, and open to new stacks.

EXPERIENCE

Full-Stack & DevOps Engineer (Apprentice)

Aug 2024 - Present

PIT - Apprenticeship

Lille, France

- Re-engineered an AI-generated application from an unreliable prototype into a **production-ready system**, redesigning the UI, business logic and API layers and establishing team-wide code review practices that were widely adopted
- Own CI/CD on Azure DevOps across production, staging and dev, automating deployments and cutting release time by **75%**
- Set up monitoring and observability with Azure Application Insights to track applications in production (logs, metrics, alerting) and surface incidents early
- Unblocked data exchange between an external training platform and the company ERP by designing a NestJS reverse-proxy (routing, URL rewriting, validation) where the two systems previously could not communicate

Full Stack Engineer

Sep 2023 - Dec 2023

Institut Laue-Langevin - Permanent

Grenoble, France

- Delivered internal applications and research tools for a national neutron-research facility, as part of a **5-person team supporting 3,000 scientists**
- Built an access-control system for a reactor safety project (physical doors, Yubikey badges, virtual access), co-writing the requirements with the French nuclear safety authority (ASN) to meet strict regulatory constraints
- Modernized the stack end to end: Angular 17 CMS and Quarkus backend, migrated and hardened Oracle databases, and set up Kubernetes integration

Mobile Developer Intern

Mar 2023 - Jul 2023

BetterCallDave - Internship

Lille, France

- Rebuilt Universal Music Digster streaming app from a debt-laden legacy codebase onto modern React Native, restoring performance and stability for **10,000 users**

Full-Stack Intern

May 2022 - Aug 2022

BetterCallDave - Internship

Lille, France

- Shipped OpenProcess, an internal authoring tool that lets non-technical editors create interactive videos (clickable zones, timed pop-ups) rendered at playback

SELECTED PROJECTS

Wakfuli | Founder & lead developer

2024 - Present

- Founded and led a **7-person team** building a live build optimizer for the game Wakfu, now **actively used by 5,000 players**; owned product direction and project management (scope, priorities, code reviews)
- Reverse-engineered the game binary formats with targeted de-obfuscation, normalizing them into clean, traceable data, under a formal agreement with the publisher (Ankama)
- Built observability into the live service with Monocle: golden signals and dashboards for errors and slow requests, to pinpoint and optimize the slowest queries

Cpu-Emulator

2023 - 2024

- Built a CPU/ALU emulator with an assembly parser, exploring low-level execution and instruction decoding end-to-end

NinIde

2024

- Wrote a Vim-inspired text editor from scratch in C (multiple editing modes, incremental search), working directly with terminal I/O (termios)

[More projects on github.com/Ninhache.](https://github.com/Ninhache)

TECHNICAL SKILLS

Front-end: React, React Native, NextJS, Angular, TypeScript, CSS, Tailwind
Back-end: Quarkus, NodeJS, ExpressJS, NestJS, TypeScript, Java, Haskell, Rust
Infrastructure: Git, Docker, Kubernetes, Unix, Azure DevOps, Azure
Programming Languages Stack: Java, TypeScript, Rust, C, C++, Haskell
Spoken: French (native), English (professional, TOEIC 860)

EDUCATION

Institut Mines-Télécom Nord Europe <i>Engineering degree in Computer Science</i>	Aug 2025 - Present
IUT A, Université de Lille <i>BUT in Computer Science</i>	Aug 2024 - Aug 2025
IUT A, Université de Lille <i>DUT in Computer Science</i>	Aug 2020 - Aug 2022

LEADERSHIP & ACTIVITIES

Member <i>Erasmus Student Network (ESN)</i> - Active member: organize events and support international students in a multicultural team - Meetings and activities run in English even among French members, so I practice professional English regularly	Jan 2025 - Present
Active member <i>Cadernis - Dofus/Wakfu reverse-engineering community</i> Engage with a game reverse-engineering and emulation community; occasional open-source contributions
